Prudenville, MI 48651

Sept 28, 2016

Ingham CRC 
301 Bush Street
Mason, MI 48854

Sept 29, 2016

Kent CRC 
1500 Scribner Ave, NW
Grand Rapids, MI 49504

Internal Traffic Control

The focus of this course is to reduce those close calls between the workers and the equipment used in transportation organizations. The training will help site workers and supervisors develop and implement Internal Traffic Control Plans (ITCPs), including:

- Understanding the hazards faced by construction workers every day, especially workers on foot
- Learning how to create safe “zones” for workers and equipment to avoid struck-by incidents
- Developing an internal Traffic Control Plan to create safe routes for workers, trucks and construction equipment

The last portion of each session will focus on specific Roadway Safety Plus (RS+) software tools that aid in roadway construction safety.

Instructor

Bruce Drewes is an OSHA-certified instructor who has worked in the transportation industry for the past 30+ years. His career began with the Idaho Transportation Department (ITD) in 1982 as a maintenance/equipment operator. In 2001 Bruce moved to the University of Idaho as the Training and Research Manager for Idaho LTAP. Bruce retired from Idaho LTAP in 2013, but continues teaching a variety of workzone and safety courses.

Registration

The registration fee is \$20. Continental breakfast and lunch will be provided. Register online for the [Sept 26](#), [Sept 27](#), [Sept 28](#), or [Sept 29](#) workshop. Questions? Email ctt@mtu.edu
