County

Increasing Road Safety Using Signs, Signals & other devices

Our elected and appointed officials are at the forefront of traffic safety issues. When safety concerns arise in a community, they are the first to know. This session will provide elected and appointed officials with the background that they need to understand the safety impacts that traffic control devices like signs and signals can have if not used properly. Following the presentation, there will be an open question-and-answer period when the presenter will address any safety topics presented. Come educate yourself to better serve your community!

Registration

There is no registration fee for participants to attend this Road Safety presentation. The Michigan Department of Transportation sponsors the trainer's expense.

Register for this event:
