Questions? Email ctt@mtu.edu

This training is for those who are familiar with Roadsoft, but want to learn more about the Sidewalk Module.

Topics Include:

- Using Roadsoft to view and update sidewalk data
- Using sidewalk reports, filters, and legends
- Defining lookup values
- Using the Laptop Data Collector (LDC) to collect sidewalk locations and data
- Using the Sidewalk Module in the Mobile app

Instructors

Mary Crane is a senior software engineer who has been with the Center for Technology & Training since 2006. She has worked in computer programming since 1988. Her foci have been the Safety Module and the TAMC reporting processes. She also provides technical support, helps conduct Roadsoft trainings, and does technical support for the AASHTOWare BrR Bridge Load Rating software. Crane has a Bachelor of Science in Computer Science from Michigan Technological University.

Andrew Rollenhagen is a software engineer for the Center for Technology & Training, where he has worked since 2011. His focus is on updates to the Laptop Data Collector (LDC), file storage, Pavement Management, and the Culvert and Bridge modules. He also provides technical support. Rollenhagen graduated from Michigan Technological University with a Bachelor of Science in Mechanical Engineering, Computer Engineering, and Mathematics.

For fulfillment of Continuing Education requirements, participants must be registered. The Center for Technology & Training's continuing education policy is available [here](#).
