AASHTO TC3 Fleet Operations: Preventative Maintenance

Self-paced, web-based training

The Fleet Operations: Preventative Maintenance is a six-part, all-encompassing series that trains agency staff and inspectors who are involved in preventive maintenance programs for fleet operations. The training provides principles related to fleet operation tools, techniques, and responsibilities. The six modules in the series are:

1. Preventative Maintenance A Primer
2. Establishment of a Successful Preventative Maintenance Plan
3. Preventative Maintenance Program Designs
4. Planning for Preventative Maintenance Work
5. Managing the Program
6. Understanding the Benefits Versus Costs of an Effective Preventative Maintenance Program

This training is made possible through AASHTO's partnership with the Equipment Management Technical Services Program (www.emtsp.org) and the Transportation Curriculum Coordinating Council (tc3.transportation.org).
