

CONSTRUCTION PROJECT MANAGEMENT BASICS

FOR LOCAL OFFICIALS

ABOUT THIS TRAINING

There are four main stages of a transportation construction project: planning, design, construction, and maintenance. Understanding the roles and responsibilities of the stakeholders involved at each of these stages is beneficial for successful and efficient project delivery. This online class will explain the stakeholder duties and expectations at each project stage so everyone from decision makers, to inspectors, to maintenance supervisors can better understand the project delivery process and learn tips for overcoming conflicts that may arise.
