

Managing Invasive Phragmites in Public Right-of-Ways

Webinar

ABOUT THIS TRAINING

Invasive Phragmites pose a significant threat to roadways, drainage systems, and municipal infrastructure, creating safety hazards and increasing maintenance costs. This webinar is designed for anyone who manages or maintains public lands, ditches, and right-of-ways. Experts will discuss the impact of Phragmites, best management practices, and effective control strategies to keep roads and waterways clear. Attendees will learn how to identify infestations, implement treatment plans, and comply with regulations to ensure long-term control. Join us to gain practical insights and resources for tackling this invasive species in your community.
