

Welcome

Michigan LTAP

2014 Winter Operations Conference

Amber vs. Green.... What We See

Amber Lights, Green Lights, White lights????

Nothing Scientific.....

Our Experience.....

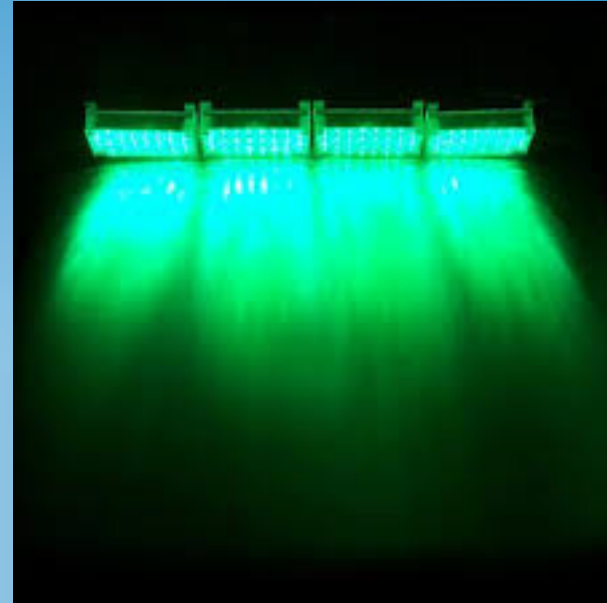

Generalized Findings.....

Questions Generated.....

Types of Lights...

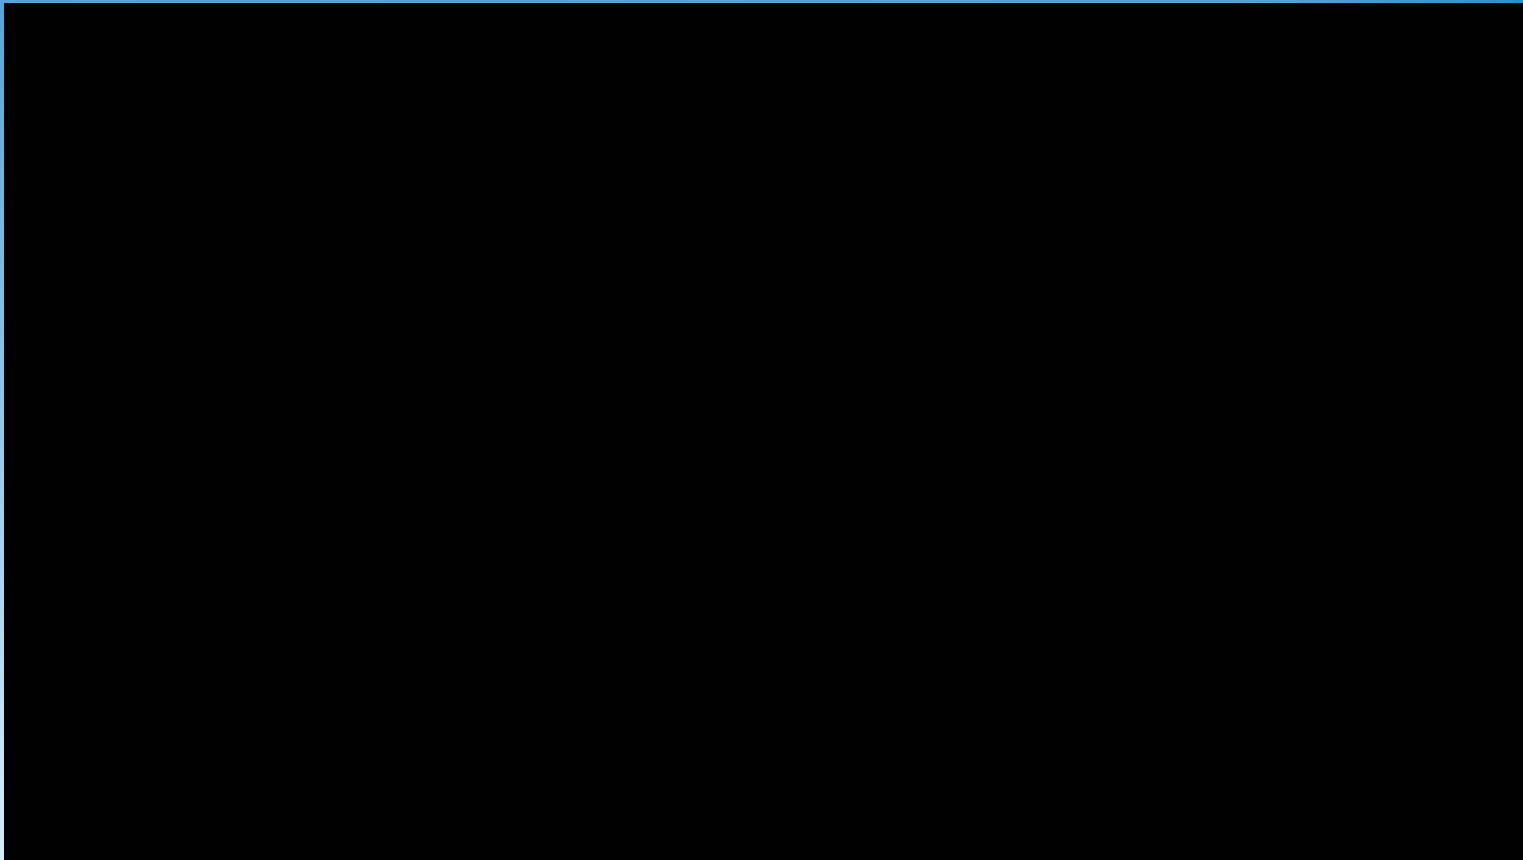

Traditional Amber

Green

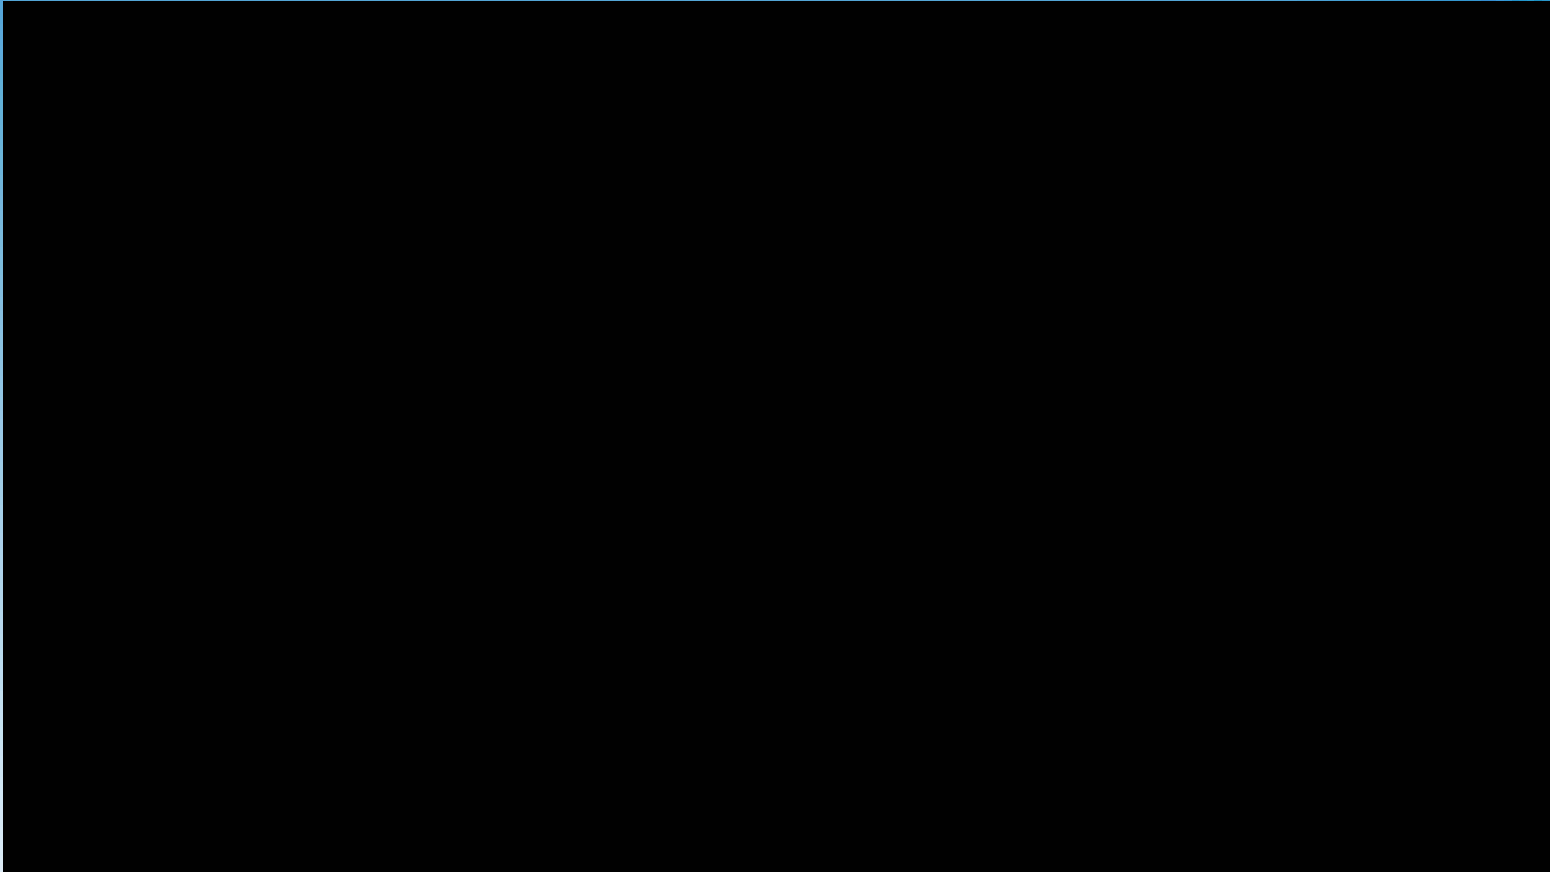

Comparisons in traffic...

Daytime Comparisons...

Nighttime Comparisons...

Are They Too Bright...

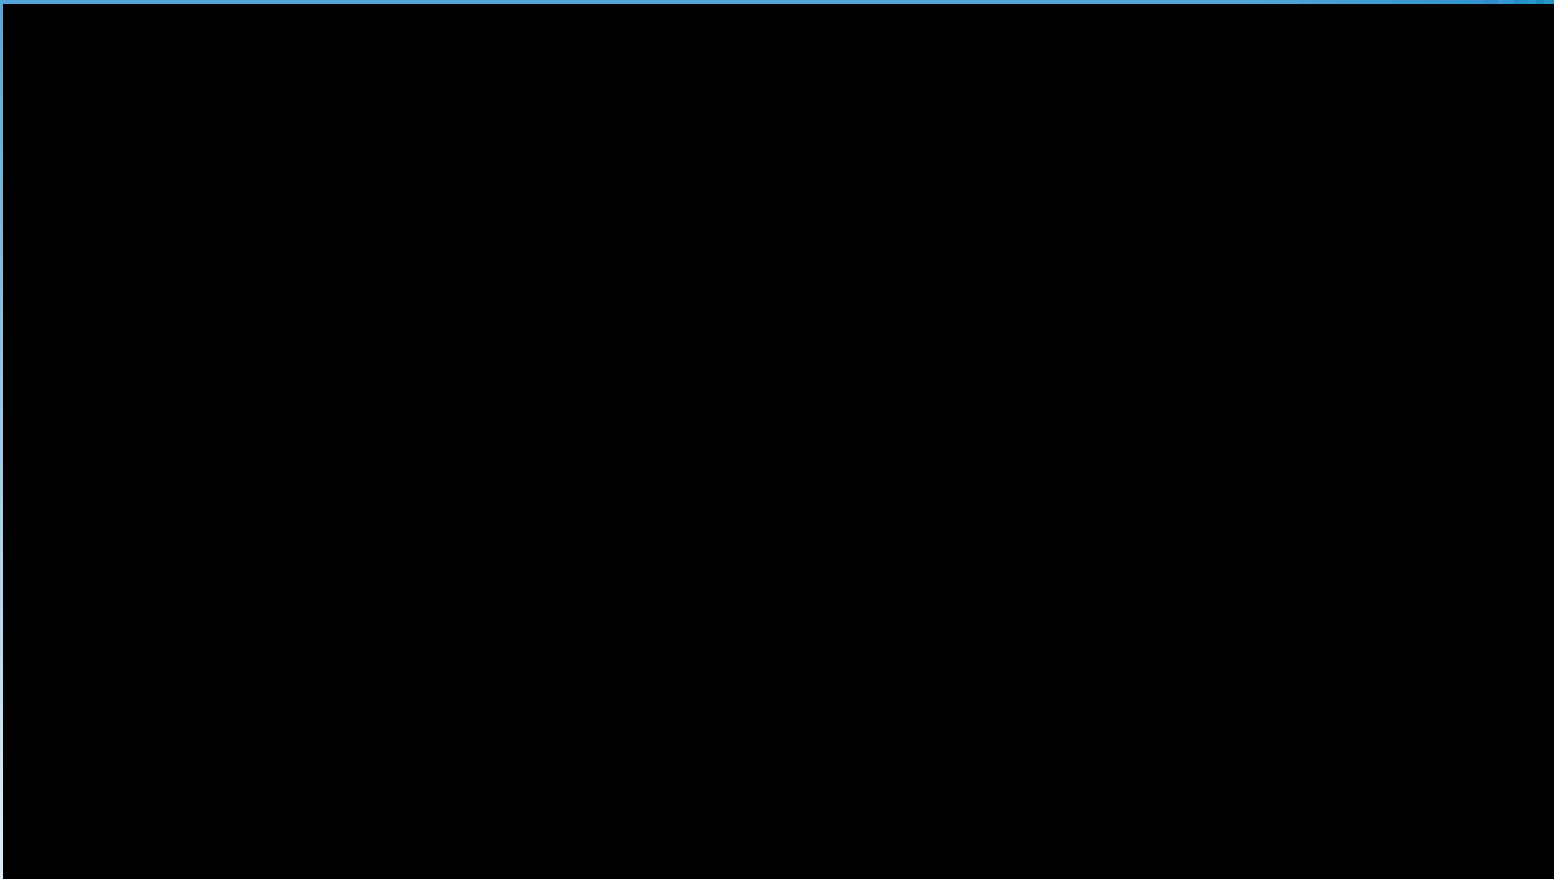

Are They Too Bright...

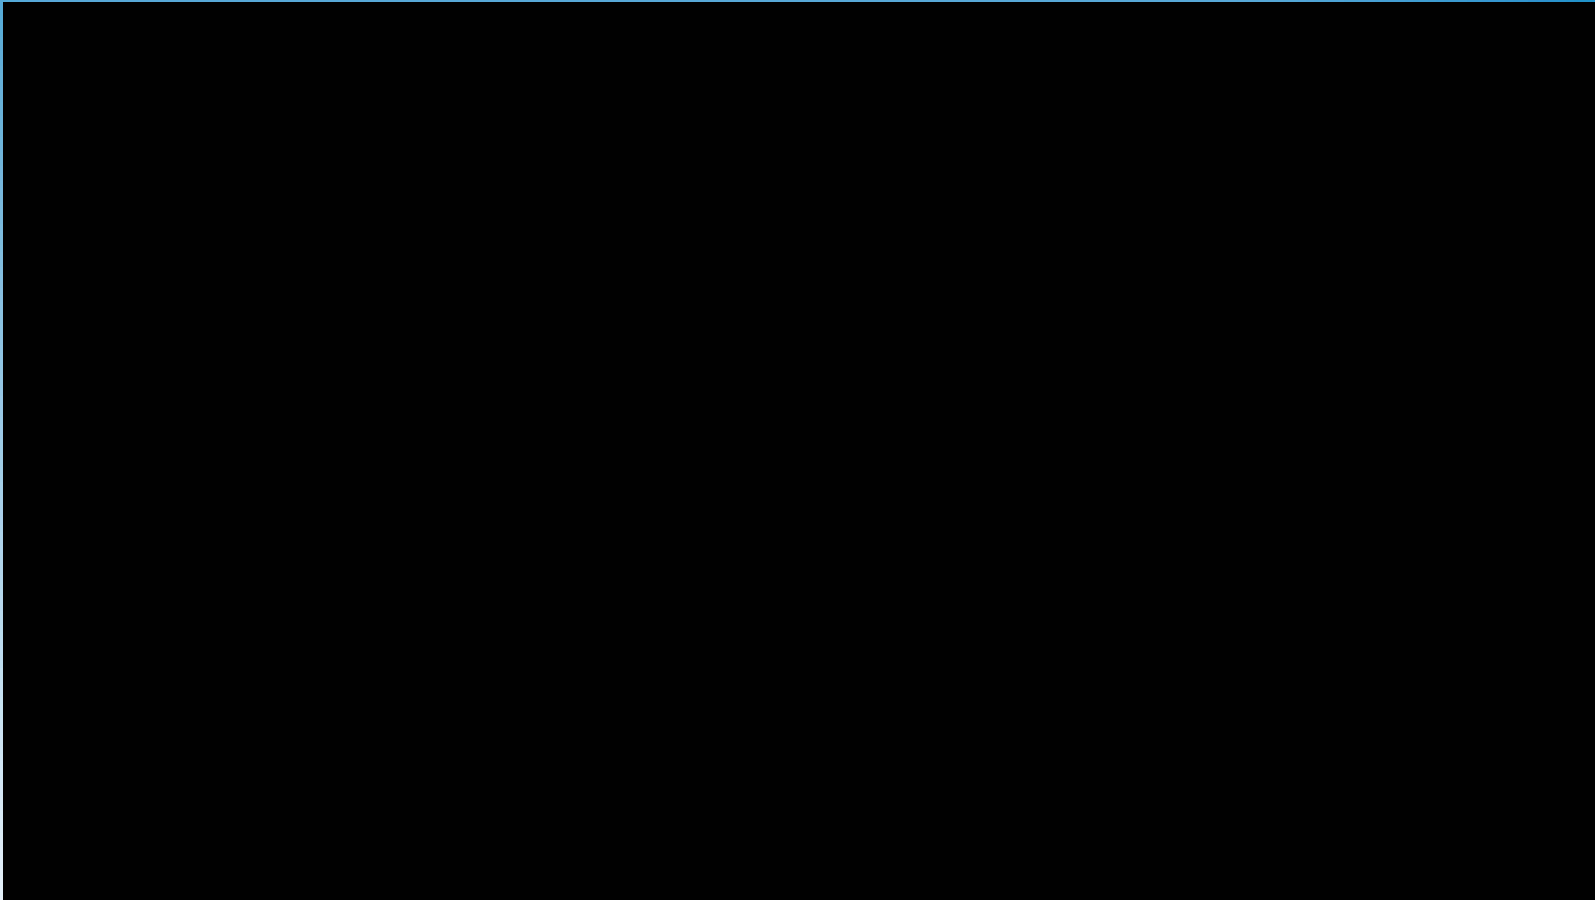

- Slow Alternating Patterns
- Install Hi/Lo Switch
- Reduce Number of LED's
- Combination Lights

Comparison to Emergency Vehicle...

Wing Blade Lit Up Marker Lights...

Questions..... Absolutely!

- Do the lights flash too quick?
- Is the green light too bright?
- Can other motorists see the brake lights?
- How many LEDS should be in the light pack?
- Does someone need to see you a mile away, or does 2,500 feet cut it?
- Can we get away with 50/50 splits, or should we do 50/50 splits?

Where does Novi go from here????

- Continue to work with proven technology
- Continue to test new ideas (controlled)
- Continue to INNOVATE
- Continue to NETWORK
- Continue to EMPOWER
- Continue to EDUCATE
- Continue to DOCUMENT
- **Develop new formulas with proven technologies to meet the needs of our employees and service requirements of the community.**

Thank You
