Good writing and good presenting can be likened to a good set of plans for road or bridge construction. Good writing and presenting are essential for communicating your intentions and ideas effectively, just like good plans are essential for the successful construction of roads and bridges. Being successful in writing and presenting depends upon knowing, applying, and modulating underlying communication principles. Sharpen your pencils! The April 21st workshop will help you identify the keys for clear and concise writing. And, you will get a chance to put these principles into practice.
